

ED Tracker

Status Events (Page 1 of 2)

The Status cell on the ED Tracker displays patient status events which communicate the progression of the patient's treatment during their ED visit.

- These events can be advanced manually; however, some are automatically advanced by the system.
- Not all indicators are used at each ministry or used the same way at each ministry.
- **Check with your ministry to learn which Status Events are used and the process you are expected to follow.**

Appears in cell	Status Event Name	Indicates
ADMIT	Decision to Admit	Verbal confirmation that Patient will be admitted to hospital. Can mean MED has requested a bed.
BED READY	Admit Bed is Ready	The requested admit bed is ready for patient
