

ED eMAR

Pyxis Override Process

1	<p>Pull the override medication from the Pyxis and administer the medication.</p> <ul style="list-style-type: none">• The override med will go to the patient's profile in Pharmacy but the <u>med will not display on the eMAR.</u>• An order for the medication pulled from the Pyxis must be entered in MEDITECH before the medication will appear on the eMAR so that you can document the administration.
2	<p>Ask the provider to enter an order for the medication in MEDITECH.</p> <ul style="list-style-type: none">• The medication order will appear on the eMAR as Unverified.• Pharmacy will receive the order. After Pharmacy verifies the order, the Current Status cell on the eMAR changes from Unverified to Active.• The frequency will be ONCE.
3	<p>Acknowledge the new Active medication.</p>
4	<p> Click the Admin Schedule footer button.</p>
5	<p> Edit the Scheduled Date/Time by clicking the Date and Time the medication is scheduled to be given. Then, use the number pad to enter the date and time you actually administered the medication.</p>
6	<p>Click OK. The time you entered appears in the Admin Date/Time column.</p>
7	<p>Click Return.</p> <ul style="list-style-type: none">• A purple Administered time stamp appears beneath the med name. Purple indicates that administration is “not yet saved.” <p></p>
