

ED eMAR

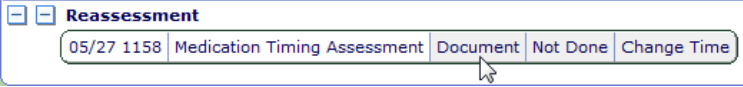

Stop Time Reassessments

Stop Times are required on all IVs, IVPB, and Bolus infusions

- 1** The MED cell on the ED Tracker turns blue when a reassessment is due.

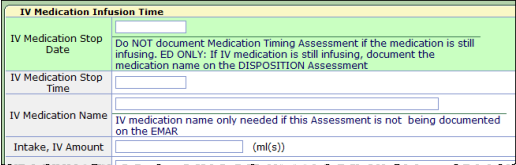

On the eMAR the **Next Sched** cell turns pink.
- 2** On the eMAR, at the due time, click the **+ Reassessment** button below the med name to display the **Medication Timing Assessment** option.

- 3** Click **Document**.

 - a. The Change Time function must only be used if the stop time is before the reassessment due time.
- 4** Enter the actual **Medication Stop Date** and **Stop Time**.

If you document **IV Intake** on this Reassessment do not document on the Infusion Assessment. DO NOT document in both places or you'll be double-documenting.

- 5** Document other assessments that pop up.

 - Some medications (e.g. Zofran or Morphine gtts) will also have a PRN Patient Response Reassessment. Use the **“Go to”** button to move between reassessments.
- 6** Click **Return**. Click **Save**.

If multiple reassessments are due on multiple meds at the same time you will get a pop-up asking if you want to apply your Reassessment to the others that are due. Uncheck all of the IV meds and only document one at a time to ensure accuracy.

Apply to Duplicate Reassessments Due:

Medication	Reassess Due
<input checked="" type="checkbox"/> 50 ml 100 MLS/HR ONCE	03/31 16:00
<input type="checkbox"/> Uncheck meds so that stop date/time is not applied to multiple medications	
<input type="checkbox"/> loride 0.9% 50 ml 100 MLS/HR ONCE	03/31 16:30
<input type="checkbox"/> Soln 1 Each 100 MLS/HR ONCE	03/31 16:30

ED Admit to Inpatients: If a patient has a main line IV running then the ED Nurse will document the reassessment at the time the patient leaves the ED.
