

# 1 Documenting Wounds in MEDITECH from HealthE\*Pix

- Before documenting, review your saved images by clicking on *Healthline* or *Wound Images* on the MEDITECH title bar in PCS or EDM.

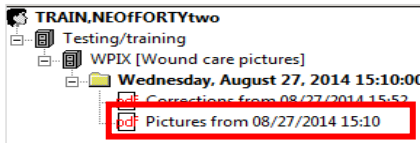

- If there are unprocessed images, you will need to click **Display History** to see your processed images.

**STOP** Classify or discard ALL of your unprocessed images before documenting in MEDITECH.

# 2 Review Image(s) in HealthE\*Pix

- Locate and click the PDF with the Date and Time of the image(s) you wish to view.

**Reminder:** Scroll to annotated images in the document to view Location, Modifiers & Measurements.

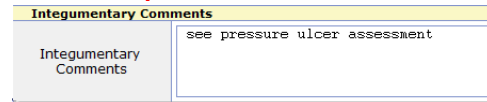

# 3 Document in Physical Assessment

Intervention	Text/Ord	Status	Src	Frequency
* Care Plan/Outcome Updated		A	SC	07,19
<b>* Physical Assessment Med/Surg</b>				
				07,19

# 4 Integumentary WDL Except

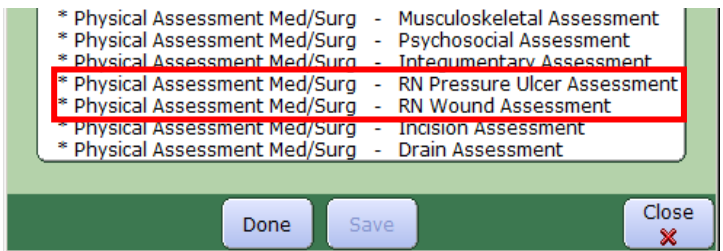

- If pressure ulcer or wound is present, select **WDL Except** in the Integumentary Assessment.
- Under **Integumentary Comments** document "See Pressure Ulcer Assessment" or "See Wound Assessment".

**\*\*Interim process until assessment is reverted to capture this documentation.\*\***

# 5 Wound or Pressure Ulcer?

- Select the correct assessment to **match** your documentation in HealthE\*Pix.

# 6 Document in Wound/Pressure Ulcer Assessment

**STOP** Location, Modifiers and Measurements should match what is documented in HealthE\*Pix.

**1 Correcting Images in HealthE\*Pix**

Documenting Wounds & Correcting Images in HealthE\*Pix, v.1 HealthE\*Pix/Ricoh Camera Taskforce.

MEDITECH title bar in PCS or EDM.

**5 Error Processing Completed**

- Click the OK button to complete processing.

The Wound care pictures has been moved back into the workflow for processing. You will not see any changes until corrections have been made.

Close Display History screen by clicking the top right X.

**2 Send the Image for Correction Processing**

- Click on and open the document to **visually confirm** you have selected the right image to edit.
- Make sure the **correct image** is **highlighted** before clicking on the External Application button.

**Reminder:** You may need to **Close** or **minimize** the PDF to click on the **External Application** button.

**6 Re-classify the Image**

- To re-classify the images, click on *Healthline* or *Wound Images* on the MEDITECH title bar in PCS or EDM.
- The image will now be **"Marked as Error"** and available to correct.
- Select the correct image(s) and click **Edit Item**.

Patient Name	Picture Date	Status	Picture Count	Location
TRAIN,NEOFORTYfive	09/04/2014 14:48	MARKED AS ERROR	1	SFMTRN
TRAIN,NEOFORTYfive	09/04/2014 16:23	MARKED AS ERROR	1	SFMTRN

3.

⌚ **Reminder: If there are multiple photos in the batch you are correcting, you will need to re-do all photos in the tray.**

### 3 Accept Responsibility for Change

#### Error Correction Processing

You are about to perform an operation against Wound care pictures that are currently registered to Patient Name TRAIN,NEOFORTYtwo (Enterprise Patient ID SOCAL.T0038707) dated 09/08/2014 13:39:00.  
If this is not correct, please close this window now.

I Understand and Accept Responsibility For The Change

Click to correct image

### 7 In closing...

- Promptly classify all images in Healthline.
- If you cannot send images from the camera, or access or see them in Healthline, contact the Help Desk.
- Be specific by informing the Help Desk you have a “HealthE\*Pix”, “Healthline”, or “Ricoh camera” issue.

**Questions about using the Ricoh Camera?**  
See *Pictorial Guide to Using the Ricoh/HealthE\*Pix Camera*

**Questions about Classifying Images?**  
See *Classifying Wounds in HealthE\*Pix*

### 4 Reason for Error Correction

Problem Description: Incorrect wound image location

Detailed Description:

Pressure ulcer on left ankle.

Confirm

- Click drop-down arrow, and then select one of the problems.
- Type **detailed description** of why you need to correct the image, then click the **Confirm** button.
