

Home Medication Documentation

Overview

Below is a high level overview of the process for documenting home medications. Step details are included in the following pages.

1	Add or review <i>Preferred Pharmacy</i> .
2	Check for external home medications using <i>Ext Med Hx</i> button.
3	Confirm and/or edit previously reported home medications and document last taken information.
4	Add new medications and document last taken information. <ul style="list-style-type: none">• Known name & dose• Unknown name & dose (undefined)• Non-formulary – not matching available drug string (undefined)
5	Document review of all medications after ALL medications including those you just added or edited and/or documented last taken. (Choose all medications & click review)
