

eMAR

Pyxis Override Process

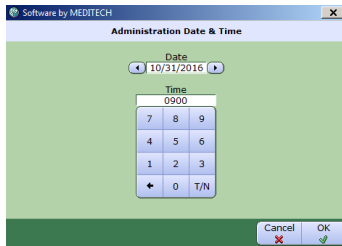

- Pull the override medication from the Pyxis and administer the medication.
 - The override med will go to the patient's profile in Pharmacy but the med will not display on the eMAR.
 - An order for the medication that was pulled from the Pyxis must be entered in MEDITECH before the medication will appear on the eMAR so that you can document the administration.
- Ask the provider to enter an order for the medication in MEDITECH.
 - **The medication order will appear on the eMAR as Unverified.**
 - Pharmacy will receive and verify the order which changes the eMAR display from **Unverified** to **Active**.
 - The frequency will be **ONCE**.
- Acknowledge the new **Active** medication.
- Click the **Admin Schedule** footer button.

Admin
Schedule

- Edit the Scheduled Date/Time by clicking the Date and Time the medication is scheduled to be given.

- Enter the Date and Time you administered the medication on the Date and Time Edit Screen.

- Click **OK** then click **Return**.
- A purple Administered time stamp below will appear. This indicates that administration is “not yet saved.”

Administered - 11/01/16 at 0900 (10/31/16 0900) 250 MG

- Document the administration by clicking **Save**.
