

# eMAR

## Titratable IV Documentation

**eMAR:** Document initial & subsequent bag hanging & view titration tables.

**Intervention List:** Document titration details & drip changes.

NOTE: Some ministries have the titration table attached to the intervention, instead of on the eMAR drug.

### Initial Bag - Documentation on the eMAR (& the Intervention List – see below)

1. Look for and acknowledge the medication order.
2. Scan the patient armband and bag, and hang the bag.
3. Program the pump based on **Protocol** table values. (You may need to refer to the intervention depending on the ministry).
  - a) If the protocol table is collapsed, click on the + sign to expand and display it.

### Initial Bag - Documentation on the Intervention List (& the eMAR – see above)

4. Add the correct **IV Infusion Assessment** intervention for your patient type

To add the intervention:

- a) Click the **Add Intervention** button.
- b) At **Search:** type **IV**.
- c) Choose the appropriate **IV Infusion/Titration** assessment for the med & patient type.

* IV Anticoagulant Titration Adult
* IV Heparin Titration PICU NICU
* IV Heparin Titration Ped PICU NICU
* IV Infusion Assessment
* IV Infusion Assmnt PED PICU NICU
* IV Insulin Titration Adult
* IV Insulin Titration PICU NICU
* IV Insulin Titration Ped PICU NICU

Note: The Critical Care Standard of Care includes the **IV Infusion Assessment** so you do not need to add it.

5. Document initial pump settings on the appropriate assessment.
  - a) The **IV Anticoagulant/Heparin Titration** assessment requires co-signature.
  - b) As you titrate according to vital signs, you could use Document Spreadsheet. Click the checkbox next to the **Vital Signs** assessment, **AND** the titration assessment, **THEN** click **Document Spreadsheet**.

### Titration Changes - Document on the Intervention List

1. Check protocol table for drip change parameters.
2. Adjust pump as appropriate.
3. Document changes on the appropriate Intervention List intervention.

### Hanging a New Bag - Document on the eMAR

Scan the patient armband and bag, and hang the bag.

### IV Titration Intake Documentation - Document on the Intervention List

Document IV Intake amounts on the same titration assessments where drip changes are documented.
