

Care Plan Documentation

Adding Additional Problems - Adult

If an appropriate problem cannot be found on the main Care Plan, you can use the **Care Plan Problems Additional** intervention.

The **Care Plan Problems Additional** intervention is a grouped assessment organized by body system. Also included are 3 assessments for problems which do not fall into a body system. These are: **Misc, Activity/ADL, & Women Infnt.**

ADULT - Additional Problem Assessment & Problems:

The screenshot displays a software interface for adding additional problems to a care plan. At the top, there is a table with the following data:

Intervention	Text/Ord	Status	Src	Frequency
Care Plan Problems Additional		A	CP	PRN

Below the table is a dropdown menu titled "Go to" with the following options:

- Care Plan Problems Additional - Care Plan Problems Misc
- Care Plan Problems Additional - Care Plan Problems Neuro
- Care Plan Problems Additional - Care Plan Problems HEENT
- Care Plan Problems Additional - Care Plan Problems Cardiac
